Dr. Rita Eisenblätter & Dr. Eckhard Willing

Berlin, September 1999

## 1. Einleitung

Hiermit möchten wir über unsere botanischen Sammelaktivitäten in Griechenland im Jahr 1999 informieren. In diesem Zeitraum konnten wir leider nur eine Reise durchführen:

26.3.99 - 15.4.99	Stere a Ellas	Etolia-Akarnania, Fokis, Fthiotis, Viotia (nur wenige Fundorte in Magnisia und Attika)
----------------------	---------------------	---

Neben topographischen Gegebenheiten und Standorttypen haben wir uns bei der Fundortauswahl auch diesmal nach 10 x 10 km-UTM-Rasterfeldern gerichtet. Wie in den Vorjahren haben wir uns in jedem Rasterfeld bemüht, alle von uns erkannten blühenden oder fruchtenden Blütenpflanzen zu erfassen und mit Herbarbelegen zu dokumentieren. Am jeweils 2. Fundort und allen weiteren Fundorten innerhalb eines Rasterfeldes haben wir versucht, nur die bisher nicht erfaßten Arten zu sammeln. Diese Beschränkung erfolgte alleine aus Kapazitätsgründen der Trockenpressen. Von dieser Vorgehensweise abweichend haben wir erneut alle erkannten Arten erfaßt, wenn es uns aus wesentlichen Veränderungen der Topographie oder der Standorte sinnvoll und wichtig erschien.

Für die Trocknung benutzten wir auch diesmal 5 Pressen, wie wir sie in "Phyton" 32 (1): 119-128; 1992 beschrieben haben. Wir sammelten täglich 220 bis 305 Pflanzen, gemittelt über die gesamten Reisen 288 (im April) bzw. 275 Pflanzen (im Juli/August) pro Tag. Wenn nicht trocken-schwierige Arten (z.B. Sedum, Valeriana) überrepräsentiert waren, waren nach 24 Stunden nur noch 5-10 (seltener bis zu 20) Pflanzen etwas feucht. Kurzfristige Probleme gab es dort, wo über Tag wegen Bauarbeiten der Strom für 5-7 Stunden abgestellt war. Bei normalen Stromverhältnissen führten auch sehr große, flächendeckende Pflanzen nicht zu Problemen bei der Trocknung. Dickköpfige Distelgewächse, dickstengelige Umbelliferen oder holziges Baumaterial beanspruchten die Wellpappen natürlich erheblich. Dennoch überstand ein Wellpappensatz die 23 Sammeltage. Um den Trocknungsprozeß bei stark beanspruchenden Pflanzen und hohen Feuchtigkeitsgehalten nicht zu beeinträchtigen, sollten stark verformte Wellpappen nach etwa 20 Tagen ausgewechselt werden. Dies wirkt sich auf die Materialkosten nur unerheblich aus, da eine Wellpappe des benutzten Formats nur etwa 0,20 - 0,25 DM kostet.

Hinsichtlich der Trockentechnik sind in Ergänzung zu "Phyton" zwei Punkte zu erwähnen:

Besonders bewährt haben sich Wellpappen, die auf der einen Seite eine graue, besonders saugfähige und auf der anderen Seite eine braune, besonders form- stabile Deckschicht besitzen. Diese Wellpappen haben sich besonders gegenüber dickstengeligen und verholzten Pflanzen als sehr stabil erwiesen.

Zur Vermeidung von Wärmeverlusten umgeben wir die Pressen bis hinab zum Boden, also rings um den darunter umgekehrt stehenden Campinghocker, mit einem 180 cm langen und 60 cm hohen "Wickelrock" aus schwer entzündbaren Kunststofffolien. Dieser paßt sich der Pressenstärke gut an, vermeidet unnötige Wärmeabstrahlung und ermöglicht selbst bei windigem Wetter das Aufstellen der Presse außerhalb von geschlossenen Räumen, zum Beispiel auf dem Balkon (Natürlich nur bei trockenem Wetter oder unter einem Dach).

- Es hat sich als sehr sinnvoll erwiesen, die Herbarpressen jeweils am Morgen durchzusehen, die Fliesmatten zu entfernen und die Zeitungseinlagen um 180° zu drehen. Dies verbessert vor allem für großflächige Pflanzen den Trocknungs- prozeß. In diesem Zusammenhang sollten auch Tissues, die zum Unterlegen bzw. Abdecken empfindlicher Blüten dienen, zum Beispiel bei Verbascum, Cistus und Helianthemum, entfernt werden. Der Zeitaufwand beträgt je nach Pflanzenauswahl 15-20 Minuten je Presse.

- Der Zeitaufwand für das Einlegen der Wellpappen zwischen die gefüllten Zeitungen und das Aufstellen der Pressen am Abend betrug für 5 Pressen 30 bis 45 Minuten.

Alle Herbarbelege wurden von uns bestimmt - hoffentlich nicht allzu fehlerhaft - und zum Teil von Experten überprüft und revidiert. Nach Eingabe der Daten in unsere persönliche Griechenland-Data Base (Access-Datenbanken mit allen Fundort- und Artenangaben) werden alle Herbarbelege im Botanischen Museum Berlin-Dahlem deponiert und sind dort verfügbar.

Mit der Reise im Jahr 1999 ergänzten wir unsere Sammlung ohne Berücksichtigung der Dubletten um ungefähr 5.300 Pflanzen. Insgesamt umfaßt unser Herbar nunmehr 77.500 Pflanzen alleine aus Griechenland.

Zur Feststellung der UTM-Gitternetzdaten und der Greenwich-Daten haben wir konsequent ein Satelliten-Navigations-GerEto benutzt. Mit Hilfe des in den drei Wochen mit einem einzigen Batteriesatz betriebenen 12-Kanal GPS Eagle Explorer konnten wir innerhalb kürzester Zeit den exakten Standort ermitteln. In einigen Fällen konnten dadurch eklatante Fehler der griechischen Straßenkarte ausgeglichen werden. Voraussetzung für eine möglichst genaue Messung ist, daß mindestens 3 Satelliten erfaßt werden konnten. In der Praxis wurden überwiegend 6 Satelliten erfaßt. An Fundorten mit hohen, dichten Bäumen oder direkt an Felswänden war es zum Teil notwendig den Meßstandpunkt um 10 oder 20 Meter zu verändern, um eine genügende Anzahl von Satelliten zu erfassen. Gegenüber den UTM- und Greenwich-Daten konnten Höhenangaben nur recht ungenau ermittelt werden. Bei 5 Satelliten und mehr wichen die gemessenen Höhen etwa 20-30 m von den Angaben des Thommen-Höhenmeßgerätes ab. Bei 3-4 Satelliten konnte die Abweichung bis 70 m betragen. Insgesamt, vor allem aber bei Aufenthalten in Bergmassiven hat sich das benutzte GerEto als ausgesprochen hilfreich und leicht handhabbar erwiesen.

Das Jahr 1999 war dadurch charakterisiert, daß der März und der April im Bereich von Sterea Ellas ausgesprochen regenreich war. Insgesamt hatten wir den Eindruck, daß die Pflanzenwelt im Vergleich zu anderen Jahren um mehrere Wochen zurück war. Ab 800-900 m Höhe lag eine geschlossene Schneedecke, Schneereste fanden wir hinab bis etwa 500-600 m Höhe. Wir mußten daher mehrmals Pflanzen aus völlig durchweichten Böden entnehmen bzw. im Regen sammeln. Daher erklären sich die zum Teil recht schmutzigen Pflanzen.

## Fundorte Sterea Ellas

In den folgenden Fundortlisten haben wir die Daten, wie sie auf den Herbaretiketten erscheinen, um die Nummern der jeweils gesammelten Belege (Spalte 3) ergänzt.

<b>Fundort</b>	<b>Herbarbelege</b>	<b>Fundort-Nr.</b>
Etolia-Akarnania, Ep. Mesolongiou, NO Ellinika, 26.3.1999 Kiefernwald in Schlucht, Schuttreißen, 160 m EH 36.22.95.43, 38°30'38"N, 21°22'40"E	72.205-72.255	Eto 380
Etolia-Akarnania, Ep. Mesolongiou, W Zevgaraki, 26.3.1999 Krautreicher Ölbaumhain, Straßenrand, 40 m EH 36.35.96.33, 38°32'18"N, 21°23'21"E	72.256-72.295	Eto 381
Etolia-Akarnania, Ep. Mesolongiou, O Pappadate, 27.3.1999 Ruderalfuren, Ölbäume, Straßenrand, 130 m EH 46.04.12.85, 38°31'32"N, 21°27'39"E	72.296-72.337	Eto 382
Etolia-Akarnania, Ep. Mesolongiou, O Gavalou, 27.3.1999 Ölbaumhain, krautig, 110 m EH 46.54.05.89, 38°31'42"N, 21°31'01"E	72.338-72.354	Eto 383
Etolia-Akarnania, Ep. Mesolongiou, N Trihonis, 27.3.1999 Ölbaumhain, Seeufer, 60 m EH 46.67.91.00, 38°33'03"N, 21°32'17"E	72.355-72.364	Eto 384
Etolia-Akarnania, Ep. Mesolongiou, SO Gavalou, 27.3.1999 Mauerflora, Krautfluren, Ölbäume, 130 m EH 46.63.48.59, 38°31'19"N, 21°31'58"E	72.365-72.372	Eto 385
Etolia-Akarnania, Ep. Mesolongiou, SO Gavalou, 27.3.1999 Bachschlucht, nasse Sandsteinhänge, Hartlaubgebüsch, 260 m EH 46.71.09.84, 38°30'16"N, 21°32'24"E	72.373-72.379	Eto 386
Etolia-Akarnania, Ep. Mesolongiou, SO Gavalou, 27.3.1999 Hartlaubgebüsch, Platanen, Krautfluren, 240 m EH 46.81.65.13, 38°30'03"N, 21°33'27"E	72.380-72.386	Eto 387
Etolia-Akarnania, Ep. Mesolongiou, SO Aj. Andhreas, 27.3.1999 Krautfluren, Ölbaumhain, Hartlaubgebüsch, 160 m EH 46.93.79.90, 38°31'19"N, 21°34'16"E	72.387-72.435	Eto 388
Etolia-Akarnania, Ep. Mesolongiou, O Aj. Andhreas, 27.3.1999 Hartlaubgebüsch, Krautfluren, 100 m EH 56.04.81.38, 38°31'28"N, 21°34'59"E	72.436-72.478	Eto 389
Etolia-Akarnania, Ep. Trihonidhos, N Sitaralona, 27.3.1999 Straßenrand, Felswand, Hartlaubgebüsch, 180 m EH 56.83.06.60, 38°31'08"N, 21°39'57"E	72.479-72.503	Eto 390
Etolia-Akarnania, Ep. Trihonidhos, SW Thermo, 27.3.1999 Ackerflora, 420 m EH 56.77.17.42, 38°33'21"N, 21°39'20"E	72.504-72.511	Eto 391
Etolia-Akarnania, Ep. Trihonidhos, N Agrini, 28.3.1999 Ruderalfuren, 140 m EH 37.36.83.86, 38°38'07"N, 21°23'22"E	72.512-72.536	Eto 392

Etolia-Akarnania, Ep. Trihonidhos, SO Spolaita, 28.3.1999 Ölbaumhain, 150 m EH 38.01.87.63, 38°41'01"N, 21°21'17"E	72.537-72.582	Eto 393
Etolia-Akarnania, Ep. Trihonidhos, NW Spolaita, 28.3.1999 Ölbaumhain, Straßenrand, Hartlaubgebüsch, 140 m EH 38.03.49.97, 38°42'13"N, 21°21'01"E	72.583-72.594	Eto 394
Etolia-Akarnania, Ep. Trihonidhos, NW Spolaita, 28.3.1999 Krautfluren, Ölbaumhain, Straßenrand, 130 m EH 28.94.89.78, 38°42'46"N, 21°20'36"E	72.595-72.637	Eto 395
Etolia-Akarnania, Ep. Trihonidhos, S Kastraki, 28.3.1999 Ölbaumhain, Krautfluren, 120 m EH 38.06.11.44, 38°43'24"N, 21°20'48"E	72.638-72.651	Eto 396
Etolia-Akarnania, Ep. Trihonidhos, S Bambalio, 28.3.1999 Sandsteinhänge mit Hartlaubgebüsch, 330 m EH 29.83.90.94, 38°47'08"N, 21°20'01"E	72.652-72.689	Eto 397
Etolia-Akarnania, Ep. Trihonidhos, S Bambalio, 28.3.1999 Sandsteinhang unter Hartlaubgebüsch, 240 m EH 29.86.87.46, 38°49'08"N, 21°19'55"E	72.690-72.693	Eto 398
Etolia-Akarnania, Ep. Trihonidhos, N Stratos, 28.3.1999 Krautfluren, Ölbaumhain, 120 m EH 28.72.95.47, 38°41'28"N, 21°19'16"E	72.694-72.723	Eto 399
Etolia-Akarnania, Ep. Trihonidhos, NW Megali Hora, 28.3.1999 Ölbaumhain, Ruderalfluren, Flußebene, 100 m EH 27.98.16.66, 38°39'21"N, 21°20'06"E	72.724-72.774	Eto 400

## **Arten**

Die folgende Liste enthält die Bogen-Nummer, die Fundort-Nummer und die Ortsangabe. Die teilweise Bestimmung nur bis zur Familie bzw. zur Gattung und aufgetretene Bestimmungsfehler bitten wir unserer mangelnden Erfahrung zuzuschreiben. Die Liste soll im Wesentlichen einen Überblick geben, welche Gattungen und Arten aus der Sammelreise 1999 zu erwarten sind.

### **Acacia cyanophylla**

72636, Eto 395, NW Spolaita.

### **Acinos alpinus**

75825, Fth 271, W Mendhenitsa,

### **Acinos rotundifolius**

76776, Vio 065, N Alikei, ; 77040, Vio 069, SW Halkis; 77328, Att 010, SO Erythre

### **Adonis annua**

74405, Fth 233, O Pelasjia; 75067, Fth 241, SO Paleohori; 76287, Vio 054, S Thive; 76318, Att 007, N Erythre; 76433, Vio 056, NO Kaparelli; 76698, Vio 063, N Ellopia, FH 83.58

### **Adonis microcarpa**

76432, Vio 056, NO Kaparelli; 77187, Vio 071, NO Asopia

### **Aetheorhiza bulbosa**

73011, Fth 181, Loutra Ipatis; 73206, Fth 189, O Aj. Sostis; 74427, Fth 234, SW Glyfa; 77117, Vio 070, SO Faros

### **Aira elegantissima**

74604, Mag 042, NW Ahillio; 75013, Fok 199, Kastelli; 76096, Vio 049, NO Mouriki

### **Ajuga chamaepitys**

73322 Fth 195, O Vitoli; 73562, Fth 202, O Lamia; 73647, Fth 206, S Grammeni; 73931, Fth 217, O Karavomylos; 74583, Mag 041, S Ahillio; 74632, Fth 239, O Amfiklia; 75277, Fth 246, SW Xyliki; 75414, Fth 252, N Modhi; 76325, Att 008, W Erythre; 76409, Vio 056, NO Kaparelli; 76661, Vio 061, SW Vajia; 76736, Vio 063, N Ellopia; 76783, Vio 065, N Alikei; 77025, Vio 069, SW Halkis

### **Ajuga orientalis**

75565, Fth 259, O Iti

### **Alkanna graeca**

74646, Fth 239, O Amfiklia; 75227, Fth 245, NO Amfiklia; 75425, Fth 253, NW Paleohori; 75568, Fth 259, O Iti; 76471, Vio 058, SW Kaparelli; 76632, Vio 061, SW Vajia; 77230, Att 009, S Erythre; 77410, Att 013, SO Vilia

### **Alkanna tinctoria**

73173, Fth 188, W Loutra Ipatis; 73453, Fth 200, S Lamia; 73587, Fth 205, S Anydhro; 73643, Fth 206, S Grammeni; 73748, Fth 211, S Platystomo; 73937, Fth 217, O Karavomylos; 74090, Fth 222, SO Sparta; 74137, Fth 224, NO Lamia; 74217, Fth 226, SW Dhivri; 74357, Fth 232, O Pelasja; 74495, Fth 236, O Glyfa; 74577, Fth 238, NO Glyfa; 74596, Mag 042, NW Ahillio; 74643, Fth 239, O Amfiklia; 75116, Fth 242, SW Dhrymea; 75304, Fth 247, SW Xyliki; 75368, Fth 251, S Modhi; 75410, Fth 252, N Modhi; 75756, Fth 269, O Rengini; 75834, Fth 271, W Mendhenitsa; 76017, Vio 047, S Mouriki; 76196, Vio 052, NO Mouriki; 76631, Vio 061, SW Vajia; 76737, Vio 063, N Ellopia; 76808, Vio 065, N Alik; 77058, Vio 069, SW Halkis; 77395, Att 013, SO Vilia; 77411, Att 013, SO Vilia; 77465, Att 015, SO Porto Jermeno

### **Alliaria petiolata**

74816, Fok 192, NO Polydhroso

### **Allium neapolitanum**

74381, Fth 232, O Pelasja

### **Allium subhirsutum**

74463, Fth 234, SW Glyfa; 77166, Vio 071, NO Asopia

### **Alopecurus myosuroides**

72263, Eto 381, W Zevgaraki; 72360, Eto 384, N Trihonis; 72786, Eto 401, O Agrini; 73150, Fth 187, Zilefto; 73370, Fth 196, W Ptelea; 73414, Fth 198, S Lamia; 73447, Fth 199, S Lamia; 73537, Fth 202, O Lamia; 73635, Fth 206, S Grammeni; 73799, Fth 214, W Platystomo; 73952, Fth 218, Kouvela; 74356, Fth 232, O Pelasja; 74870, Fok 193, NO Polydhroso; 74873, Fok 194, NW Lilea; 75032, Fok 199, Kastelli; 75243, Fth 245, NO Amfiklia; 75900, Fth 273, NW Anavra; 75946, Vio 046, S Mouriki; 76232, Vio 053, S Thive

### **Althaea hirsuta**

77493, Att 016, Porto Jermeno

### **Alyssum**

73983, Fth 218, Kouvela; 74901, Fok 194, NW Lilea; 75628, Fth 264, Pavliani; 75786, Fth 269, O Rengini; 75807, Fth 270, SO Mendhenitsa; 75821, Fth 271, W Mendhenitsa
